

Rahul Mishra

hello@blankparticle.com / India

[blankparticle.com](#) / [github.com/BlankParticle](#) / [linkedin.com/in/blankparticle](#) / [x.com/blankparticle](#)

Full-stack engineer with a bias for backend systems, mostly in TypeScript. OSS contributor, and occasional fixer of other people's problems in Discord.

EXPERIENCE

Software Engineer

Jun 2025 - Jul 2026

[Iterate](#) [Full-time](#) [Remote · UK](#)

- Worked across the stack - TanStack Start frontend, daemon backend architecture, build/deploy pipeline, and sandboxed environments for AI agents
- Built MCP servers/clients and a custom OAuth server for authentication
- Built integrations like Slack bots, OAuth logins, GitHub Apps, auth bridges/workers
- Built and contributed to ecosystem tooling - [safe-durable-objects](#), [workers-sdk](#), [alchemy](#) and more

Software Engineer

Feb 2025 - May 2025

[Orchid](#) (prev. MailO) [Contract](#) [Remote · US](#)

[github.com/Mail-0/Zero](#) · 10.5k stars

- Shipped the Cloudflare Workers backend, migrated the data layer from SWR to tRPC + TanStack Query, and restructured the codebase into a pnpm monorepo
- Rewrote the mail driver with full type safety and built a secure HTML email sanitizer and renderer
- Built a local query cache for faster load times, removed the Next.js proxy layer for direct API calls

Software Engineer

Feb 2024 - Sep 2024

[Unproprietary Corporation](#) (u22n) [Part-time](#) [Remote · US](#)

[github.com/un/inbox](#) · 1.7k stars

- Architected the email backend - ingestion, queue processing, SMTP delivery, and connectors for Google/Outlook on Railway
- Built a JS bridge into a Rails SMTP server to unblock product dev while a replacement was scoped
- Built the billing system, rich text editor with slash commands, OpenTelemetry instrumentation, and org/domain management
- Rewrote the Vue/Nuxt frontend as a React/Next.js App with TanStack Query, real-time sync, and an email-as-chat interface, unlocking the wider React ecosystem for the team

OPEN SOURCE & PROJECTS

PRs & issues across [better-auth](#), [alchemy](#), [hono](#), [react-router](#), [workers-sdk](#), [tsdown](#), & others

[portable](#)

Go local dev proxy with HTTPS, friendly hostnames, and SSH tunnels

[gnome-bluetooth-quick-connect](#)

GNOME Shell extension for quick Bluetooth pairing

[spotapi](#)

Serverless Spotify Lyrics API on Cloudflare Workers

[tailwind-plugin-realtime-colors](#)

Tailwind plugin to load tokens from Realtime Colors

[get-palette](#)

Zero-dep image color palette extraction

[vite-plugin-hono](#)

Run Hono with Vite's dev server and WebSocket support (exploration)

SKILLS

LANGUAGES	TypeScript/JavaScript, Go, Rust, Nix (familiar)
FRAMEWORKS	React, Svelte, React Router, TanStack, Hono, tRPC/oRPC, DrizzleORM
INFRA	Cloudflare, Vercel, Railway, Alchemy (IaC), Docker, Caddy, PostgreSQL
TOOLING	Monorepos, Turborepo, tsdown, Vite/Vitest, GitHub Actions, and all other general tooling
